Summary

Mobile engineering leader with 4+ years shipping production-grade Flutter, Kotlin, and SwiftUI apps across enterprise and startup environments. Currently leading 6+ engineers at Technonext Software Ltd, driving architecture decisions, delivery, and engineering standards. Author/co-author of **4 peer-reviewed papers** in AI/ML (IEEE/Springer), national hackathon champion, and **Top-Rated Plus** on Upwork (top 3% globally, 100% JSS).

Experience

Technonext Software Ltd

Software Engineer (Team Lead)

Sept 2025 – Present

Dhaka, Bangladesh

- Lead a cross-functional mobile team of 6+ engineers across Flutter and Kotlin (Jetpack Compose) — owning sprint planning, architecture decisions, code reviews, and delivery timelines.
- Architected enterprise mobile solutions with Clean Architecture, DDD, and feature-based modular design — offline-first sync, Dart Isolate background processing, scalable BLoC/Riverpod state management, and multi-flavor configurations, cutting onboarding time by 30%.
- Enforced dependency injection strategies using `get_it` and `injectable` (Flutter) and `Koin` (Kotlin), improving testability, decoupling, and long-term maintainability across all active projects.
- Integrated LLM-powered features using OpenAI and Claude APIs with RAG pipelines, accelerating delivery cycles and expanding product intelligence.
- Mentored 4+ engineers through pair programming, code reviews, and technical coaching, measurably raising team code quality.
- Standardized CI/CD pipelines with Fastlane and GitHub Actions, cutting deployment time by 35% across 3+ concurrent projects.
- Owned project estimation, resource allocation, and cross-functional alignment across product, UI/UX, QA, and backend teams — reducing delivery bottlenecks by 25% and consistently meeting stakeholder commitments.

Upwork Global Platform

Senior Mobile Engineer — TV Apps, Streaming & Mobile (Independent Contractor)

Jan 2024 – Present

Remote

- Top-Rated Plus** freelancer (top 3% globally) with a **100% Job Success Score** and a track record of long-term client relationships — multiple clients retained for 6–12+ month engagements.
- Specialist in **TV app development** (Android TV, Fire TV) and **P2P media delivery** — built production IPTV and streaming platforms serving thousands of concurrent users.
- Designed and implemented a production-grade P2P video sharing architecture where peers exchange media chunks directly, reducing central server bandwidth load by ~30%, cutting buffering latency by 25%, and delivering reliable streaming at scale.
- Delivered multi-platform streaming apps (Android, iOS, Android TV) with multi-format playback, EPG support, VOD, live TV, and personalized content management.

W3Engineers Ltd

Software Engineer

Dec 2023 – Aug 2025

Dhaka, Bangladesh

- Owned end-to-end development of 7+ scalable mobile apps in Flutter and SwiftUI, achieving an average App Store rating of 4.8/5 and reducing user-reported issues by 35%.
- Improved app load speed by 25% and crash rates by 30% through systematic performance profiling, targeted refactoring, and architectural improvements.
- Shipped a diverse portfolio spanning audio/video streaming, TV app interfaces, QR scanning, and e-commerce — each meeting App Store and Play Store marketplace standards.
- Reduced deployment time by 40% by implementing CI/CD pipelines with Fastlane and GitHub Actions; authored comprehensive technical documentation and team coding standards.
- Designed and deployed an internal AI decision-support tool using LangChain and Python, streamlining operational workflows and surfacing data-driven revenue insights.
- Drove structured design and QA review cycles that increased user engagement by 20% and reduced post-release bug reports by 15%.

- Delivered cross-platform Flutter and Kotlin applications for Android and iOS, improving performance by 30% through code optimization and architecture improvements.
- Built a real-time chat module for a rental management platform using Firebase and FCM, cutting communication lag by 50% and significantly improving user response rates.
- Shipped a Currency Converter app with live exchange rates, earning a 4.7/5 user satisfaction score; developed a Medicine Reminder app with smart scheduling that boosted daily active usage by 40%.
- Led full-cycle development of a Dumpster Booking and Transfer app, enabling seamless reservation and logistics management for end users and operators.

Technical Skills

- **Cross-Platform (Flutter):** Dart, BLoC, Cubit, Riverpod, Provider, GetX, Dependency Injection
- **Native Android:** Kotlin, Jetpack Compose, Coroutines, Flow, WorkManager, Foreground & Background Services
- **Native iOS:** Swift, SwiftUI, The Composable Architecture (TCA), AVPlayer
- **Architecture & Design Patterns:** Clean Architecture, Domain-Driven Design (DDD), Test-Driven Development (TDD), MVVM, MVC, SOLID Principles, Modular Architecture
- **AI Integration:** LangChain, OpenAI API, Anthropic Claude API, RAG Pipelines, Prompt Engineering
- **Backend & APIs:** REST APIs, WebSockets, Firebase (Auth, Firestore, Realtime DB, Functions), Stripe, PayPal
- **Database:** Hive, ObjectBox, SQLite, Firebase Firestore, MySQL, PostgreSQL
- **CI/CD & DevOps:** Fastlane, GitHub Actions, App Store & Play Store Deployment, Release Management
- **Leadership & Process:** Agile/Scrum, Sprint Planning, Code Reviews, Technical Mentoring, Long-term Client Management, Stakeholder Communication

Education

- **Bangladesh Army University of Science and Technology (BAUST)** Jan 2018 – Feb 2022
Bachelor of Science in Computer Science — CGPA: 3.77/4.0 Nilphamari, Bangladesh
- **Cantonment Public School and College, Rangpur** Jun 2015 – Jun 2017
Higher Secondary Certificate — GPA: 5.0/5.0 Rangpur, Bangladesh

Honors and Awards

- **Champion – bdapps National Hackathon 2022:** Won 200,000 BDT (1st place) among 2,000+ competing teams nationwide
- **Honorable Mention – ACM ICPC Asia Regional Dhaka 2019**
- **Certificate of Achievement – ICPC International Collegiate Programming Contest**
- **Merit Scholarship –** Multiple terms, Bangladesh Army University of Science and Technology

Independent Ventures

Mess Monitor | *Flutter, Firebase, PHP, MySQL, AWS* | *Google Play* January 2023

- Hostel management app built in Flutter; won **1st Place at the bdapps National Hackathon** and deployed on Android and iOS.
- Shipped meal management, daily cost tracking, dues tracking, and mess join/leave flows; integrated FCM for push notifications and AWS for scalable hosting.
- Automated App Store and Play Store deployments via Fastlane CI/CD pipelines, maintaining consistent release quality across updates.

Xtream IPTV Player | *Flutter, Xtream Codes API* | *Google Play* January 2024

- Developed a Flutter IPTV app supporting live TV, VOD, and series streaming on Android, iOS, and Android TV via the Xtream Codes API.
- Engineered smooth, high-quality playback with multi-format support, intuitive navigation, robust search, and personalized favorites management.
- Optimized rendering and buffering performance for low-latency streaming in both home and mobile network environments.
